**App brief:** Vadilal Pulse Sales Force Automation (SFA) mobile app will automate Vadilal ice-cream sales tasks. It reduces the time consumed in such processes by simplifying its accessibility and easy handling as well. It also provides easy and effective data management just at one platform and sync all app data to SAP server. The main tasks for which it is especially design and crafted for are:

- Daily and monthly attendance of sales employees.
- Order booking with stock management and sales upload.
- Available schemes for merchants.
- Asset and Beat management with approval models.
- HR Module which includes Leave, Travel and Expense managements.
- Customer and Competitor Feedback management.
- Managing dealers and Distributors.
- Customized reports with drill-down options.
- Few features of this app run offline while rest all features required internet connection.

This app helps to convert all paper work to digital data which is easily available with infographics reports and customized dashboard both for the app as well as for web module. System diagram for Vadilal Pulse SFA Android App is shown below to understand the architecture and flow of information.
